The plan is designed to offer Takaful benefit along with growth of funds to meet your multiple savings and protection needs.

It is a Shariah compliant multi-purpose savings plan by IGI Life-Window Takaful operations that safeguards you and your family against future financial losses. The plan assists participants to share their risk on the basis of cooperation, brotherhood, mutuality and solidarity for a common good. There is flexibility of customising the solution through additional protection benefits as well as by selecting the level of Takaful cover as per need.

How does the Takaful membership operate?
IGI Life’s Takaful model is based on the Wakalah-Waqf principal. Individuals in the community come together for a common purpose and contribute into a Waqf Fund operated by a Takaful Operator to protect themselves against future financial losses.

What is surplus sharing?
Participants of the takaful fund as per the terms and conditions of the Waqf, may be entitled to a share of surplus funds. Takaful offers a unique feature of Surplus Sharing to the participants in addition to risk mitigation benefits. As approved by the Shariah Advisor and Appointed Actuary at the end of each year, IGI Life-Window Takaful Operations will determine the surplus (if any) available in the PTF for distribution.

What are the benefits of surplus sharing?
Part of the surplus (if any) in PTF is distributed amongst eligible participants in the form of bonus units through additional unit allocation in the Participant’s Investment Account (PIA). The allocation of these bonus units will enhance the cash value of your Takaful Plan.

In which funds will my contributions be invested to build up the PIA for my future needs?
Your contributions will be invested in Shariah compliant investments to build the PIA.

You will be offered 5 different Shariah compliant investment strategies: Conservative, Balanced and Aggressive as described below:

Conservative Strategy: The strategy would be the most appropriate for those participants who wish to invest more cautiously. Accordingly, the investments placed in short-term fixed income Shariah compliant instruments with no exposure to equities.

Balanced Strategy: This strategy seeks steady growth in capital through investments in combination of Shariah compliant fixed income and equity investments.

Aggressive Strategy: This strategy seeks to provide you with long term capital growth through mutual funds that invest mainly in equities.

Under each strategy, you have an investment account as listed in the application. The percentage of contribution you wish to allocate to buy units in an investment account should be indicated in the application. The sum of these percentages must be 100%.

You can manage your investments by creating your own investment strategy portfolio from a range of options to suit your needs and preferences. You have the option to transfer between investment accounts subject to certain conditions.
