

As mentioned in Note 45.1 of Financial Statements, Full Disclosure on the Capital Adequacy, leverage Ratio & liquidity Requirements as per SBP Instructions has been placed below

1 CAPITAL ASSESSMENT AND ADEQUACY

1.1 Scope of Applications

Amounts subject to Pre - Basel III treatment

The Basel-III Framework is applicable to the bank both at the consolidated level (comprising of wholly/partially owned subsidiaries & associates) and also on a stand alone basis. While calculating Consolidated Capital Adequacy for the Bank, Subsidiaries are included using full consolidation method whereas associates in which the Bank has significant influence, are included on equity method. Standardized Approach is used for calculating the Capital Adequacy for Credit and Market risks, whereas, higher of Alternate Standardized Approach (ASA) or 70% of Basic Indicator Approach (BIA) is used for Operational Risk Capital Adequacy purpose.

1.2 Capital Management

1.2.1 Objectives and goals of managing capital

The Bank manages its capital to attain following objectives and goals:

- an appropriately capitalized status, as defined by banking regulations;
- acquire strong credit ratings that enable an optimized funding mix and liquidity sources at lesser costs;
- cover major risks underlying business activities; and
- retain flexibility to harness future investment opportunities, build and expand even in stressed times.

1.2.2 Statutory Minimum Capital Requirement and Capital Adequacy Ratio

The State Bank of Pakistan through its BSD Circular No.07 of 2009 dated April 15, 2009 requires the minimum paid up capital (net of losses) of all locally incorporated banks to be raised to PKR. 10 billion. The paid up capital of the Bank for the year ended December 31, 2023 stands at PKR. 15.771 billion and is in compliance with the SBP requirement.

The capital adequacy ratio of the Bank is subject to the Basel III capital adequacy guidelines stipulated by the State Bank of Pakistan through its BPRD Circular No. 06 of 2013 dated August 15, 2013. These instructions are in effect from December 31, 2013 in a phased manner with full implementation by December 31, 2019. Under Basel III guidelines Banks are required to maintain the following ratios on an ongoing basis:

Existing Minimum Capital Requirements:

| Sr. No | Ratio | 2023 |
|--------|------------------------|--------|
| 1 | CET 1 | 6.0% |
| 2 | ADT 1 | 1.5% |
| 3 | Tier 1 | 7.5% |
| 4 | Total Capital | 10.0% |
| 5 | *CCB | 1.50% |
| 6 | Total Capital Plus CCB | 11.50% |

**Starting March 2020, Capital Conversation Buffer (CCB) as prescribed vide BPRD Circular No. 6 of August 15, 2013 has been reduced from its existing level of 2.50% to 1.50%, till further instructions; thereby resulting in CAR requirement of 11.50%.*

Bank's regulatory capital is analyzed into three tiers:

-Common Equity Tier 1 capital (CET1), which includes fully paid up capital (including the bonus shares), balance in share premium account, general reserves, statutory reserves as per the financial statements and net unappropriated profits after all regulatory adjustments applicable on CET1

-Additional Tier 1 Capital (AT1), which includes perpetual non-cumulative preference shares / TFCs and share premium resulting from the issuance of preference shares, after all regulatory adjustments applicable on AT1.

-Tier 2 capital, which includes Subordinated debt/ Instruments, share premium on issuance of Subordinated debt/ Instruments, general provisions for loan losses (up to a maximum of 1.25% of credit risk weighted assets), net reserves on revaluation of fixed assets & AFS portfolio and foreign exchange translation reserves, after all regulatory adjustments applicable on Tier-2.

The required capital adequacy ratio was achieved by the Bank through improvement in the capital base, adequate risk profile of asset mix, ensuring better recovery management and maintaining acceptance profit margins. Banking operations are categorized as either trading book or banking book and risk-weighted assets are determined according to specified requirements of the State Bank of Pakistan that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures. The total risk-weighted exposures comprise of the credit risk, market risk and operational risk.

Basel-III Framework enables a more risk-sensitive regulatory capital calculation to promote long term viability of the Bank. As the Bank carry on the business in multiple jurisdiction and segments, it is critical that it is able to continuously monitor the exposure across entire organization and aggregate the risks so as to take an integrated approach/view. Maximization of the return on risk-adjusted capital is the principal basis to be used in determining how capital is allocated within the Bank to particular operations. The Bank remained compliant with all externally imposed capital requirements through out the year. Further, there has been no material change in the Bank's management of capital during the year.

1.2.3 Leverage Ratio

Leverage ratio is defined as ratio of Bank's Eligible Tier 1 Capital to Total Exposure. For BAFL, the ratio as at December 31, 2023 stands 3.50% (2022: 3.54%), calculated on average of three months exposure. The ratio has been computed as prescribed by State Bank of Pakistan through Instructions for Basel-III Implementation in Pakistan and subsequent FAQs issued in this regard.

As on December 31, 2023; Total Tier 1 capital of the Bank amounts to PKR 123.871 billion (2022: PKR 95.911 billion) whereas the average total exposure measure amounts to PKR 3,536.686 billion (2022: PKR 2,706.795 billion).

1.2.4 Risk Appetite

Risk Appetite Statement is an expression of the amount of risk. The Bank is prepared to take to achieve its strategic objectives. In line with the corporate goal, mission and strategy, bank's risk exposure is maintained within the risk appetite as defined by the Board of Directors. The Bank has defined its risk appetite in the form of 'Risk Appetite Statement' which has duly been approved by the Board & monitored on quarterly basis.

1.2.5 Stress Testing

Stress testing examines the sensitivity of Bank's Capital for Regulatory as well as Economic capital under a number of scenarios and ensures that emerging risks stemming into its portfolio are appropriately accounted. The scope of this exercise has been expanded to incorporate internally developed scenarios based on macroeconomic situation & portfolio composition as well.

1.2.6 Capital Adequacy

Bank's approach for assessing the adequacy of the capital to support current and future business operations is based on the following:

- Capital Adequacy plays key consideration for not only arriving at the business projections / plans but it is well monitored while undertaking transactions.
- The bank continues to remain sufficiently capitalized institution with the capital base above regulatory limits. Bank's total Capital Adequacy Ratio stands at 16.74% against the requirement of 11.50% (including CCB of 1.50%); while supporting credit growth and steady dividend payout stream.
- The capital base forms the fundamental constituent-of Bank's business plans; which is at sufficient level to support the envisaged business growth and this would be monitored regularly.
- In line with enhanced Supervisory requirements under Domestic Systemically Important Bank framework by State Bank of Pakistan, Bank also performs ICAAP exercise on annual basis in order to assess the adequacy of capital internally which yields surplus capital, inclusive of stress testing and pillar 2 risks.
- The Bank enjoys strong sponsor support from Abu Dhabi Group, leading to increased investor confidence
