## Explanatory Note

Companies are recommended to assess the risks related to the potential theft or compromise of their technology, data or intellectual property in connection with the well as how the recognition of these risks may impact their business, including their financial condition and results of operations, and any effects on their reputations, long-term value. Where these risks are material to investment and voting decisions, they should be disclosed, and we encourage companies to provide disclosure to evaluate these risks through the eyes of management. Please note that disclosure about these risks should be specifically fit to a company's unique facts and circ that corrogations should continue to consider this grouping area of risk and evaluate its materiality on an oppoing basis.

that corporations should continue to consider this growing area of risk and evaluate its materiality on an ongoing basis.

Further, the Company should not make such detailed disclosures that could compromise its cybersecurity efforts — for example, by providing a "roadmap or pi those who seek to penetrate a company's security protections. However, companies should disclose IT governance and cybersecurity risks and incidents investors, including the associated financial, legal, or reputational consequences, if any.
